Transformation

RSI specialization in enterprise IT transformation requires our staff to stay abreast of information technology evolution. We have supported a myriad of migrations and upgrades for network, server, and desktop operating systems, such as UNIX or Windows XP; database management systems, such as Oracle; electronic mail systems, such as MS Exchange; and applications, such as MS Office. For our US Army customers we successfully designed and implemented Active Directory and Voice Over Internet Protocol (VOIP). Current IT transformation initiatives include Enterprise Service Management, Knowledge Management, Learning Management, Information Systems Security, and Information Assurance. We are adept at successful IT transformations that are well planned, tested in a safe environment, and

executed with minimal end-user disruption. To enable successful transformation initiatives, RSI encourages and supports employees in their efforts to stay abreast of the latest advances in industry leading software, network, and personal computer products. We manage the transformation activities, including change management and configuration management. And, we train the users on the new features and capabilities that result.

Past Performance

RSI's past performance is an excellent means for predicting future success. RSI provides our employees with a stable work environment, competitive compensation and benefits, and an opportunity for career growth and enhancement that have resulted in an average retention rate in excess of 90% for each of the past three years. Our employees, in turn, deliver high quality, timely services that enable our customers to derive productivity and performance benefits from information technology. Our proven ability to apply and exploit the latest advances in information technology adds value to our high quality services. By coupling a streamlined management structure with efficient and effective business processes, RSI is able to deliver professional services at highly competitive rates throughout the country. Let us partner with you to solve your most challenging requirements.
